

Assignment No. 1.

Page No.	
Date	

Condition :

if-else.

Q.1

check Positive number

```
class CheckPositiveNumber {
```

```
public static void main(String args[]) {
```

```
int Number = 15;
```

```
if (Number > 0) {
```

```
System.out.println(Number + "is positive number");
```

```
} else {
```

```
System.out.println(Number + "is negative number");
```

```
}
```

Q.2

check Negative Number

```
class CheckNegativeNumber {
```

```
public static void main(String args[]) {
```

```
int Number = -12;
```

```
if (Number < 0) {
```

```
System.out.println(Number + "is negative number");
```

```
} else {
```

```
System.out.println(Number + "is positive Number");
```

```
}
```

3. check odd or Even Number

```

class CheckOddEvenNumber {
    public static void main(String args[]) {
        int Number = 4;
        if (Number % 2 == 0) {
            System.out.println("Number is even Number");
        } else {
            System.out.println("Number is odd Number");
        }
    }
}
    
```

4. Display Good Morning Message

```

class DisplayGoodMorningMessage {
    public static void main(String args[]) {
        int time = 9;
        if (time >= 5am && time <= 12pm) {
            System.out.println("Good Morning");
        }
    }
}
    
```

5. Print Area of square

```

class AreaOfSquare {
    public static void main(String args[]) {
        double side = 9;
        double Area = side * side;
        System.out.println(Area + " is area of square and its side is " + side);
    }
}
    
```

c. print Area of Rectangle

```
class AreaOfRectangle {
    public static void main(String args[]) {
        double length = 5;
        double width = 7;
        double area = length * width;
        System.out.println("Area of rectangle with " + length +
            " length and " + width + " width is " + area);
    }
}
```

Q. 7) check largest number from 3 numbers

```
class LargestOfThreeNumber {
    public static void main(String args[]) {
        int num1 = 15;
        int num2 = 17;
        int num3 = 19;
        if (num1 > num2 && num1 > num3) {
            System.out.println(num1 + " is greatest number");
        }
        else if (num2 > num1 && num2 > num3) {
            System.out.println(num2 + " is greatest number");
        }
        else {
            System.out.println(num3 + " is greatest number");
        }
    }
}
```
