Q. 1

```
class AvgMarkGradEvaluation {
    public static void main(String args[]) {
        int Maths = 80;
        int Science = 55;
        int History = 90;
        int AvgMarks = (Maths + Science + History) / 3;
        if (AvgMarks >= 90) {
            Grade = "A";
        } else if (AvgMarks >= 80 && AvgMarks <= 89) {
            Grade = "B";
        } else if (AvgMarks >= 50 && AvgMarks <= 79) {
            Grade = "C";
        } else if (AvgMarks >= 30 && AvgMarks <= 49) {
            Grade = "D";
        } else {
            Grade = "F";
        }
        System.out.println("AvgMarks: " + AvgMarks);
        if (Grade == "F") {
            System.out.println("Fail");
        } else {
            System.out.println("Grade: " + Grade);
        }
    }
}
```

```

} else if (Day == 6) {
    Sop("The Day is Saturday");
} else if (Day == 7) {
    Sop("The Day is Sunday");
} else {

```

```

    Sop("The Day is Invalid");
}

```

Q.2

```

class LeapYear {
    public static void checkLeapYear (int year) {
        if ((year % 4 == 0 && year % 100 != 0) || (year % 400 == 0)) {
            System.out.println(year + " is leap year.");
        } else {
            System.out.println(year + " is not leap year.");
        }
    }
}

```

```

    public static void main (String args[]) {

```

```

        checkLeapYear(2024);

```

```

        checkLeapYear(2024);
    }
}

```

Q.3

Days of week

```

class DaysOfWeek {

```

```

    public static void main (String args[]) {

```

```

        int DayNumber = 1;

```

```

        switch (DayNumber) {

```

```

            case 1:
                System.out.println("The Day is Monday");
                break;

```

```

            case 2:

```

```

                Sop("The Day is Tuesday");
                break;

```

case3:
Sop ("The Day is Wednesday");
break;

case4:
Sop ("The Day is Thursday");
break;

case5:
Sop ("The Day is Friday");
break;

case6:
Sop ("The day is Saturday");
break;

case7:
Sop ("The day is Saturday");
break;

default:

Sop ("Invalid Day Number");
break;

}
}

Q.4 Identify values of Uninitialised variables,
class UninitializedVariables

public static void main (String args[]) {

byte a;

short b;

int c;

long d;

float e;

double f;

char g;

boolean h;

System.out.println ("byte" + a);

Sop ("short" + b)

Sop ("int" + c)

Sop ("long" + d)

Sop ("float" + e)

Sop ("double" + f)

Sop ("char" + g)

Sop ("boolean" + h)

}
}
